Johnley Batchu

Agentic AI–driven Product Designer shaping enterprise platforms through delegated autonomy, orchestration, and explainable workflows. Experienced in AI-powered SaaS across Quality Engineering, cybersecurity, and HR. Builds autonomy-aware experiences that reduce friction, improve SDLC/STLC efficiency, and strengthen Human–Agent Collaboration—driving 30% higher adoption and 25% better CSAT.

SKILLS

Designing for Agentic AI : Delegation architecture, Explainable AI Design, API-based agents, Human–Agent Collaboration (HAC) Design
UX Research: User Interviews, Surveys, Competitor Analysis, Affinity Mapping, Empathy Mapping
UX Design: Wire framing, Prototyping, Persona Creation, Customer Journey Mapping
Visual & UI Design: Sketching, Visual Design, Design Systems
Development & Tools: HTML, CSS, JavaScript (DOM)

TECHNICAL EXPERIENCE

VALUELABS | Product Designer - *Mar 2023 - Present*

AiDE Agentic AI Platform

- Contributed to the AiDE® Agentic AI platform used by 7,000+ engineers and 300+ enterprise clients, collectively saving 500,000+ hours of engineering effort.
- Designed delegation-ready UX across SDLC/STLC workflows, restructuring the control plane, reducing steps, and clarifying autonomy levels, intervention points, and workflow handoffs for QA and developer personas.
- Led logic-heavy interaction design for multi-step automated sequences, ensuring agent actions were explainable, confidence-backed, auditable, and aligned with XAI transparency standards.
- agentic workflows for Impact-Based Testing, enabling a single user action to trigger a full autonomous pipeline—commit analysis → impact detection → test case generation → Execution → Reporting → Jira updates—with transparency
- Integrated AiDE with Jira/Azure DevOps using structured, machine-readable workflows, enabling seamless user-story import, prompting, editing, and efficiency measurement across engineering teams.
- Designed Conversational AI interfaces for e-commerce that improved response accuracy and reduced user frustration, increasing customer satisfaction by 50%

AiDE Recruit

- Revamped real-time performance dashboards for the Delivery/Recruitment Leadership Teams and recruiters, increasing data comprehension and decision-making process efficiency by 50%
- Designed and prototyped a Candidate Portal that automated key steps, cutting application processing time by 40% and increasing applicant engagement by 30%
- Provided candidates with status updates on their applications from initial submission to onboarding or rejection resulting in 50% faster new hire processing time
- Reconfigured the Resource Requisition Form (RRF) module, which streamlined data collection for accuracy and expedited approval by leadership teams by 60%

Bot Creation Interface

- Redesigned the Bot Creation Framework with an intuitive drag-and-drop interface, making bot building more accessible for non-technical users and enabling teams to create bots 40% faster
- This modular bot framework facilitated creation of both guided flow bots and FAQ bots with reduction in development time by 75%

AiDE Phish, Security, API, DataHub

- Led user research to design DataHub's intuitive interface, automating test data provisioning and eliminating redundancy—enabling QA teams to reduce test cycles from 10 to 7 and accelerate testing efficiency by 30%
- Collaborated with SMEs, users, and developers to integrate design best practices, cutting design iteration cycles by 35%
- Refined the UX for AiDE Security products(AiDE Phish and AiDE Security) by restructuring navigation and improving information hierarchy, reducing user errors by 40% and increasing task completion rates by 25%
- Additionally, contributed to the "AiDE API" tool by improving the Contract testing feature

Design System

- Established core design guidelines for the AIDE Design System, ensuring 100% component consistency and improving design reusability by 40%

Swavy (UI Designer) - *Jan 2023 - Mar 2023*

- UI Designer for Swavy, a web3 social app, creating customizable modular interfaces that secured the first 100 users and achieved a 70% positive response on initial prototypes.

Freelance (DESIGN CONSULTANT) - *Nov 2020 - Jan 2023*

- UI/UX Design - Developed engaging website designs, improving user satisfaction by 25%
- ARCHITECTURAL DESIGN - Designed residential and commercial spaces with a user-centered approach, improving functional flow, spatial usability, and overall experience for occupants.

EDUCATION

Acharya Nagarjuna University ,Guntur - **2015 - 2020**
Bachelor of Architecture

Jawahar Navodaya Vidyalaya,WG - **2008 - 2015**
XII class (M.Bi.P.C)
